Company

HALO's mission is to provide the highest quality products at a competitive price while providing "best-in-class" customer service. HALO is a privately held company which allows flexibility and quick decision making to best serve our customers changing demands.

HALO designs and manufactures a broad line of communication and power magnetics. Its products are found across the world in markets from consumer devices to critical medical and

high reliability applications.

Headquartered in Las Vegas, NV HALO has sales locations in most major markets with the bulk of the R&D done in the United States and China.

HALO's product applications include networking and telecom equipment, industrial control, medical systems, automotive, security, and many more. HALO looks forward to partnering with you.
