

HALO Electronics, Inc. Introduces a new 3 Watt DC/DC Converter Isolation Transformer for use with the Maxim MAX256™

Press Release: September 26, 2005

HALO is pleased to announce a new series of 3 Watt isolation transformers designed specifically for the Maxim MAX256™ controller and H-Bridge driver. This circuit is ideal for Industrial Controls, Medical and Telecommunications applications.

The HALO TGM-H series of toroidal transformers provides a high efficient, 1.5KV isolation solution in a small cost effective 8 pin SMD package. This extremely low DCR family has been fully tested, approved and recommended by Maxim in commercial and extended temp range MAX256™ applications.

Samples are available from stock to 3 weeks lead time. Production lead time is 8-10 weeks.

HALO Electronics is a technology leading, manufacturer of communications and low power management magnetics providing next generation solutions today for the LAN and WAN industries. The company is a global supplier with customers located in over 40 countries.
