

HALO Announces a New 30 Watt POE+ Power Transformer for Akros Silicon AS1135 PD

Press Release: March 17, 2008

HALO Electronics, Inc. is pleased to announce a new series of IEEE802.3at power transformers designed specifically for use with the new Akros Silicon AS1135 PD controller chip (please see the Akros press release at http://www.akrossilicon.com/press_room/as1135_release.html)

This new series of UL60950/EN60950 recognized isolation transformers is designed for full 30 watt PoE applications when used with the AS1135 controller chip.

The Akros AS1135 controller chip is the first IC to meet the proposed IEEE802.3at standard for higher power PoE PD applications. HALO is pleased to be a transformer partner with Akros Silicon. Through this relationship HALO has provided our years of transformer expertise and has successfully developed AS1135 compatible transformers providing standard output voltages at 3.3V, 5V and 12Volts.

For more information about Akros Silicon please visit the Akros Silicon web site at: <http://www.akrossilicon.com>

For more information regarding this series of PoE power transformers please see our PoE Power transformer section of the HALO website.

HALO Electronics, Inc., a global supplier, provides technology leadership in LAN and Telecom magnetics. We are committed to providing the communications industry "Next Generation" solutions today.
