

HALO Develops the Industry's First Dual Port Gigabit Ethernet Solutions

Press Release: August 2001

HALO is pleased to announce the industry's first Dual Port Gigabit Ethernet magnetic solutions. This IEEE802.3 compliant family is available in both low cost and high performance versions. Standard temperature range (0-70°C) and industrial temperature range (-40 to +85°C) models are also available.

The extended temperature versions are ideal for industrial controls, telecom and robust networking equipment applications. Individual datasheets are available from your local HALO representatives under non-disclosure agreements. Samples are available from stock and production lead times are 4-6 weeks. Higher density solutions are in development and at test at major silicon vendors. Production release is scheduled for Q4, 2001.

HALO Electronics, Inc., a technology leading, global supplier of LAN and Telecom magnetics, is committed to providing the communications industry next generation solutions today.
