

HALO Develops a Complete line of VoIP 10/100 Isolation Modules

Press Release: February, 2002

HALO has developed the most complete line of IEEE802.3af compliant 10/100BASE-TX magnetics for Voice over IP and remote power applications. All "RP" solutions are designed to provide up to 350mA of current while providing excellent Ethernet functionality at either 10 or 100 Mbits/second data rates.

Solutions are available in single, dual and quad port packages to meet the requirements for both the remote and switch locations. Single port devices are available in the HALO Ultra™, 16 pin SOIC package. Nine standard dual port solutions are available in 3 different packages. In addition, HALO offers a complete line of quad port solutions utilizing two different standard packages to meet the most demanding requirements.

Extended temperature range products are available in each family making the HALO "RP" series ideal for all designs including the Industrial Controls and Telecommunications applications. Individual data sheets are available from your local HALO representative. Samples are available from stock to 2 weeks with production lead times at 4 weeks.

HALO Electronics, a leading global supplier of LAN and Telecom magnetics, is committed to providing the communications industry next generation solutions today.
