

## HALO ADSL Transformers Approved in Globespan FourtePlus™ Applications

**Press Release: November 2001**

HALO Electronics is pleased to announce that HALO part number TGSSP-DSL48EP has been approved by Globespan for use with the company's FourtePlus™ solution in its G12 and G16 Annex A/C/H Central Office (CO) designs.

This new SMT EP-7 ADSL transformer has been optimized for use with the Globespan LIU and provides excellent electrical performance. This real estate efficient, 8 pin J-Lead package, also reduces height which measures 0.415" (10.54) maximum.

HALO engineers have designed this device with supplemental insulation at 250V working voltage to meet IEC950, UL60950 and EN60950 safety requirements.

HALO Electronics, Inc., a technology leading, global supplier of LAN and Telecom magnetics, is committed to providing the communications industry next generation solutions today.
