

HALO® Electronics Expands Connector Product Offering with New Family of Single Port Shielded 8P8C RJ45s

LAS VEGAS, May 14, 2018 – HALO Electronics, a leading supplier of FastJack™ integrated Ethernet RJ45 connectors and discrete transformers, today announced the addition of 8P8C shielded modular connectors. The initial offering will include multiple gold platings and LED colors available in tab-down, tab-up, and vertical latch orientations.

“This new series of 8P8C RJ45 connectors is a perfect complement to our ever-growing line of high quality Ethernet discrete transformers providing our customers a single stop for all of their Ethernet connectivity requirements”, says Jeff Heaton, HALO’s Vice President of Technical Marketing.

The HCJ series offers the following specifications:

- Extended Operating Temperature Range (-40C to +85C)
- 750 Mating Cycles
- PoE/PoE+/4PPoE Capable

The HCJ series is available through the HALO franchised distributor partners. Production lead-time is stock to ten (10) weeks.
